**Accessing Student Wi-Fi on OSX**

The following instructions demonstrate how to connect an OSX based device to the student Wi-Fi Network at WCI.

1. From Desktop, select “Turn Wi-Fi On”.

2. Select “WCI Student” from Network.

3. Select the “WCI Student” network.

4. Open a web browser, for example Safari.

   - Read the conditions of use and login.
   - Username = 02StudentNumber
   - Password = WestDOB (DDMMYYYY)
     - i.e. West26051986
     - (NOTE only the W is a capital!)

Troubleshooting

1) Sometimes the browser retains information stored from previous wireless connections. If the web browser fails to load the web page go back to Step 2 and turn the WiFi off and on again and then proceed through these instructions.

2) You can also attempt to use an alternate browser if you cannot browse by the end of these instructions.

If you are still experiencing problems please contact IT Services on the Ground Floor of the A Block West end building, or call us on 92331040.

*This guide was completed on an iMac running OSX Yosemite Version 10.10.2
