**Accessing Student Wi-Fi on iOS**

The following instructions demonstrate how to connect an iOS based device to the student Wi-Fi Network at WCI.

1. From the Home Screen select “Settings”

2. Browse the available Wi-Fi networks.

3. Select the WCI Student network.

4. Open a web browser, for example Safari.

Read the conditions of use and login.
Username = 02StudentNumber
Password = WestDOB (DDMMYYYY)
  i.e. West26051986
  (NOTE only the W is a capital!)

Troubleshooting

1) Make sure that the Cellular Data (3G/4G) is turned off on the device.
2) Sometimes the browser retains information stored from the Cellular Data connection. If the web browser fails to load the web page go back to Step 2 and turn the WiFi off and on again and then proceed through these instructions.
3) You can also attempt to use an alternate browser if you cannot browse by the end of these instructions.

If you are still experiencing problems please contact IT Services on the Ground Floor of the A Block West end building, or call us on 92331040.

*This guide was completed on an iPad Air running iOS Version 8.1
