Collaborative Partnerships workshops provide Educators with the knowledge and skills required to meet the information needs of the community and how to effectively work with families to provide appropriate education and care for children.

The workshops have an emphasis on the importance of working in partnerships, strengthening families and building communities. Your project will consist of researching the community you are in, identifying services available and organising ways to share information and resources with families. The workshops will be delivered over a three week period.

The assessment closely reflects the National Quality Framework and the ethos of Being, Belonging and Becoming featured in the Early Years Learning Framework.

**BY COMPLETING THIS COURSE YOU WILL**

- Employ the appropriate mechanisms to identify information requirements of the community
- Collect and maintain information on a range of relevant issues/services for your client group
- Identify inadequacies in the information base and implement strategies to address them
- Share information with families about children’s progress, relationships, interests and experiences
- Provide information to families about the service
- Provide information about community services and resources.

**COLLABORATIVE PARTNERSHIPS SKILL SET**

- CHCINF407D Meet the information needs of the community
- CHCECE026 Work in partnership with families to provide appropriate education and care for children and resources
