Educational Programme and Practice workshops support Educators through the planning and programming cycle taking into account the frameworks that influence their practice.

You will collect information about children in your service, use this information to design learning and play environments and collaborate with others to provide a meaningful and stimulating curriculum.

The assessment is closely aligned with the National Quality Framework and the ethos of Being, Belonging and Becoming so that you can reflect the Early Years Framework in your programs.

BY COMPLETING THIS COURSE YOU WILL

• Identify and apply learning frameworks
• Clarify the framework’s relationship to aspects of relevant law and regulations
• Work in collaboration to apply the principles and practices of the learning framework
• Investigate how the framework is applied
• Learn the knowledge and skills required to analyse information about children’s learning
• Ensure the observation methods used to gather information consider assessment principles
• Monitor children’s learning and development
• Identify children’s strengths, interests and relationships in accordance to the framework
• Use evidence to plan for children to learn through play, intentional teaching and modelling
• Implement strategies to ensure that children’s documentation can be shared with families.

EDUCATIONAL PROGRAM AND PRACTICE SKILL SET

• CHCECE009 Use an approved learning framework to guide practice
• CHCECE022 Promote children’s agency
• CHCECE023 Analyse information to inform learning
• CHCECE024 Design and implement the curriculum to foster children’s learning and development
